Câu 1

```
class Person {
    String ho;
    String ten;
    String bieth;
  public void Person ( String ho, String
ten, String bieth ) {
        this.ho = ho;
        this.ten = ten;
        this.bieth = bieth;
  }

  void xuat () {
        System.out.print ( "ho" + ho + "ten"
+ ten + " ngay sinh" + bieth );
}
```

Câu 2:

```
class Sinh vien {
    public void nhap ( ) {
```

```
        this. masv = masv;
        this. diemtb = diemtb;
}

        void xuat () {
            return masv;
            return diemtb;
        }

class Main {
    poblic static void main (String args[])
{
        Person ps = new Sinhvien ();
        ps. Nhap ();
        ps. xuat ();
}
```
